

TRUE WOOD CLAD SYSTEM

The wood clad system will provide the natural beauty of wood interior, while maintaining the structural integrity and performance of a thermally enhanced exterior aluminum system. Unlike the “button” attachment systems offered by many competitors, Solar Innovations, Inc.’s wood clad system utilizes a new patent-pending attachment method which will hold fast for years to come. Although Solar has provided a wood veneer interior for years, the thicker wood cladding utilized in this system will allow the surface to be sanded or refinished multiple times without causing damage to the wood or the aluminum frame. Solar Innovations, Inc. provides wood clad systems for interior finish applications only.

FEATURES

- 1/2" to 5/8" wood clad depth*
- Multiple systems available
 - Curtain Wall
 - Folding Glass Wall (G2 Only)
 - Lift Slide
 - Pivot Door
 - Sliding Glass Door
 - Stacking Glass Wall
 - Terrace Door
- Accommodates 1" and larger glazing infills*
- Standard aluminum finishes: AAMA 2603
- Duracron: Hartford Green, Bronze, Black, Natural Clay, White, Sandstone
- LEED friendly system including recycled content
- Designed and Manufactured in the U.S.A.

OPTIONS

- Oversized panels upon request*
- Wood brick molds along head & jambs
- FSC certifeid wood available upon request
- Specialty wood options available
- Standard wood finish
 - Multi-coat water based interior finish
 - Solvent or water-based exterior finish
- Custom wood finishes upon request
- Custom aluminum finishes
 - Class I anodized: Dark Bronze, Clear
 - Powder coat finish: AAMA 2604-2605
 - Fluoropolymers (50% or 70%): 2604-2605
- Horizontal mullions
- Fixed mesh insect screen available
- Integrated sidelites and transoms

***Dependent upon system and final engineering**
