

VINYL-COMPOSITE SWING DOORS

Versatile entrances for any application.

Solar Innovations® now offers a line of uPVC Vinyl-Composite Swing Doors. These doors are perfect for both commercial and residential applications for front or main entrance doors. Banquet halls often use numerous sets of French doors to connect a balcony or other outdoor entertaining areas. All Terrace, French, and Dutch Doors have a durable uPVC framing that can withstand extreme weather conditions. Transoms and side lights can be added to the vinyl-composite doors with ease. The uPVC vinyl frame will not rot, warp, or rust like many other systems. Vinyl does not conduct heat or cold through the framing and into the interior room, which helps to create an energy efficient door.

FEATURES

PANELS:

- Terrace, French or Dutch Doors
- Inswing or outswing
- 20 year warranty
- LEED friendly system including recycled content

Please Note: Depending upon color selection, extra cost and lead times may apply for all finishes other than Solar Innovations® stock standards. Color illustrations are shown as accurate as standard photography and printing processes allow. Final finish selection should be made from a physical sample; please contact Solar Innovations® to receive samples. All product and finish options are subject to vendor availability. Solar Innovations® reserves the right to discontinue any option at any time without notice. Additional options, including custom color matches, are available; contact a Solar Innovations® sales designer for details.
