Who We Are

SINGLE SOURCE SUPPLIER

Single source supplier of aluminum, wood, and vinyl composite glazing systems; creating consistency throughout your project.

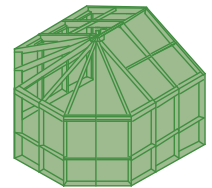

IN-HOUSE ENGINEERS AND R&D STAFF

Our in-house engineering team allows us to guide customers through the decision making process and ensure optimal project success and value.

MADE IN THE U.S.A.

Solar Innovations® Architectural Glazing Systems is proud to manufacture our products in Pine Grove, PA. We are committed to creating jobs and growing our local economy.

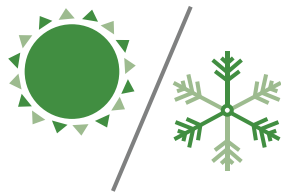

CUSTOM DESIGNS

Our on-site designers make it possible for us to assist our customers, their architects, and/or their general contractors with any design-build project.

CUSTOMER SERVICE FOCUSED

We provide customers with project specific quotes. Our friendly team is available to balance product design and value.

THERMALLY ENHANCED PRODUCTS

During the design phase, our products are evaluated for thermal efficiency. The product performance can be further enhanced through glass selection.

ON-SITE TEST LABS

Customers are invited to visit our test labs where our team designs and tests core offerings and project specific products to meet the most stringent performance requirements.

ENVIRONMENTALLY RESPONSIBLE

Solar Innovations® aluminum extrusions contain approximately 41 percent pre-consumer and 23 percent post-consumer recycled content.

About us

As an industry leader for more than 20 years, Solar Innovations® has a long history that is rooted in the heart of manufacturing with a deep passion for the American dream. As a single source provider of custom glass structures, skylights, windows, doors, and more, Solar Innovations® strives to endlessly innovate and design custom products throughout the world. Our products continue to develop and grow as a direct result of our dedication to the industry and the creativity of our customers.

By investing in our team and customers, we are proud to turn dreams into reality. All of our American made products are designed and manufactured at our campus in Pine Grove, PA, allowing for more flexibility to provide superior products and services. In addition, most of our engineering, product testing, and product designing take place within our facility. By producing as many components as possible in-house, we have greater control over quality, lead times, and cost, which ultimately achieves better results for our customers.

Although Solar Innovations® comes from small and humble beginnings, we now reside in a 400,000-square-foot corporate and manufacturing space. With a three-building campus located on over 36 acres of land, our company continues to develop and grow by creating innovative designs and engineering new product lines. The Solar Innovations® team strives to forge its path into the future by promoting a strong spirit of unity, with the desire to be better today than yesterday.

1998

Solar Innovations® is started in Hellam, PA in a 6,000 sq. ft. facility with 6 team members.

We acquire a 30,000 sq. ft. facility in Myerstown, PA, employing 21 people.

2000

We produce our first folding glass walls.

2004

The largest folding glass wall is impact tested.

2005

Our first international project: Russia

2006

Our Myerstown facility expands to 45,000 sq. ft.

Our first multi-panel retractable roof: Bahamas

2007

Innovative Reel Technologies® — a custom fishing reel line — is launched (irtreels.com).

Our first impact-rated wood curtain wall: Somers Point, NJ

2008

Our first complete glazing package: Truro, MA

2009

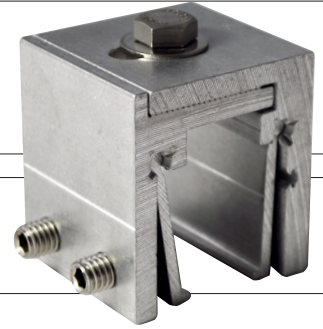

We move to Pine Grove, PA to a 224,000 sq. ft. facility with 97 team members.

2010

Universal Clamps® — a mounting bracket for standing-seam roof systems — is launched (universalclamps.com).

Solar Innovations® is awarded LEED Gold Certifications.

2011

2012

IRT officially builds first prototype of its cutting edge fly reel.

We are named in *Inc. Magazine's* annual Inc. 5000 Fastest Growing Companies for the first time.

Solar Innovations® is featured on DIY Network's hit series "Million Dollar Contractor."

2013

We acquire our third building in Pine Grove industrial park, expanding the campus to 24 acres.

2014

Our G3 Multi-Slide and G3 Lift Slide doors are impact tested with panels up to 5 feet wide by 10 feet tall.

Our patented sliding wood facade system is incorporated into the Tower at PNC in Pittsburgh, PA making it the "greenest skyscraper in the world."

Our first vinyl project: Falls Church, VA

SOLARCARES

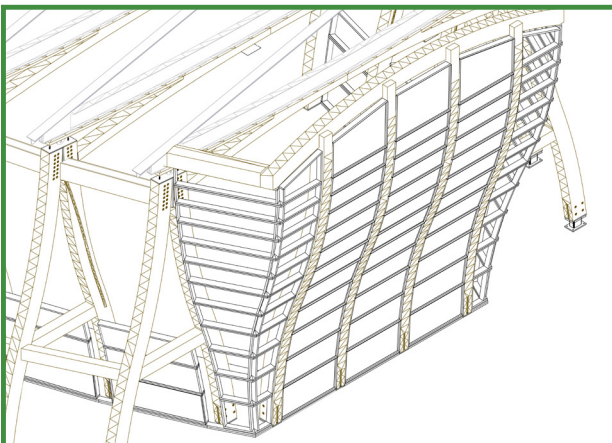

Solar Cares — a charitable effort — is born.

2015

The Schuylkill County Chamber of Commerce selects Solar President, Greg Header, as the 2015 Entrepreneur of the Year.

We purchase a vineyard, making our campus over 36 acres.

2016

We publish our first AEC Daily course on Operable Walls for Sustainable Design.
We expand our manufacturing space by 30,000 sq. ft.

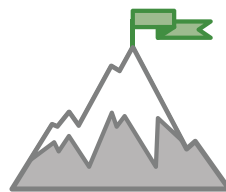

Solar Innovations® is chosen to provide the massive curved unitized wood curtain wall at a music center in Massachusetts.

2019

CORE VALUES

**DRIVE SAFETY FIRST**

We are dedicated to leading our industry by prioritizing safety above all else and fostering a company culture that encourages team members to be leaders in safety.

**MAKE THE IMPOSSIBLE POSSIBLE**

Innovation is in our DNA. We partner with those on the cutting edge of technology who want tomorrow's products today.

**DELIVER A CUSTOMER EXPERIENCE BEYOND EXPECTATION**

We are committed to exceeding our customers' expectations by providing 6-star customer service.

**BE BETTER TODAY THAN YESTERDAY**

Continuous improvement is a never ending journey, both personally and professionally. We measure our success against the highest standards — our own.

**LIVE AND WORK GREEN**

We are committed to help preserve our environment and prove the difference that a team can make in our world.

**BUILD STRENGTH THROUGH TEAMWORK**

Teamwork is the foundation for innovation and creativity. Through partnerships with our customers, peers, and our team, anything is possible.

Why Choose Us?

GREEN, INNOVATIVE PRODUCTS

Our innovative products are a direct result of the company's philosophy—manufacturing products with outstanding thermal performance, durable framework, and green properties. Products contain stainless steel spacers and recyclable momentive silicone, which have significant life spans for long-lasting products. Utilizing these products helps structures achieve several LEED points.

STRONG CORE VALUES

Solar Innovations® is a single source provider of custom glazed products. Our corporate philosophy is in the Company's core values, which boasts driving safety first, making the impossible possible, delivering a customer experience beyond expectation, being better today than yesterday, living and working green, and building strength through teamwork. As a result, our team provides solutions and work efficiently to create quality products.

LEED GOLD FACILITY

Moving on June 22, 2009, you can now find our current manufacturing facility in Pine Grove, PA. The three-building operation is now on a growing 36+ acre campus and includes a state-of-the-art corporate office and manufacturing facility. The facility was designed to meet LEED Gold certification, 98.5 percent landfill free, and 85 percent off the grid. Included in our facilities are our showroom, three onsite greenhouses, and an in-house test lab.
